

## REMARKS

The specification has been amended to correct editorial errors that have heretofore gone unnoticed. The nucleotide and amino acid sequences have been removed since they are set forth in the Sequence Listing; correct SEQ ID Nos have been inserted in the text so it is consistent with the Sequence Listing. The specification has also been amended so that adipocyte enhancer binding protein 1, SNARE YKT6 and glucokinase are recited consistently throughout the text. Given the large number of changes, a marked up and clean version of the specification is included. No new matter has been added.

The claims additionally have been amended to more distinctly claim that which Applicants regard as their invention. Again, no new matter has been added and the claims are supported by the specification.

Date: 1/27/04

Respectfully submitted,

Cheryl H. Agris, Reg. No. 34,086
